

## Membership Form

---

**Career development** is a life-long process of managing learning (formal and informal), work (paid and unpaid) and transitions in order to move towards a preferred career. It is the knowledge, skills and attitudes needed to effectively navigate education and employment choices, changes, and progressions through a person's life span.

**Mission:** The Career Development Association of PEI is a network of professionals, community partners, and individuals committed to providing leadership to strengthen career development initiatives on PEI.

**Objectives of the Association:** To influence policy, to identify leading practices, and to enhance career service delivery to all Islanders requires a coordinated effort with the right partners at the table.

CDA of PEI is integral to raising professional standards, to creating professional development opportunities, to producing evidence-based publications and research, and to disseminating timely updates to all career development members who are directly and indirectly influencing the career development of the labour force on PEI.

**Career Development Professionals on PEI:** The Career Development Association of PEI was established in 1999 and incorporated in 2011. Our members work with individuals in the K-12 education system, post-secondary institutions, those unemployed and underemployed, and those seeking career transition services.

**CDA of PEI Membership:** being a member of CDA of PEI will provide up-to-date career development information from across the country, access to eligible training, access to an annual conference, to be a part of planning and offering an annual Phyllis Pitre Bursary, and an opportunity to volunteer your time and services to the associations mission.
